

I've annotated pages 13-22 of the Dube declaration and will enclose copies. I've had a problem in going over the documents, legal-sized, and in recalling which ones you had in mind. I put a slip on the first page of Category 6 (64) but found one page bent over, so I wonder if you want me to go over all of these or just that page? As I skimmed these pages of docs I do not recall seeing the bypass of Langley that I recall from my examination when first disclosed and I got the impression from mere glancing that Dube is sticking, come hell or high water, to the original and even then unjustified withholdings.

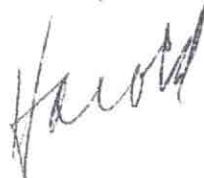

The first justification on bent-over page 66 is the cable 1232. What they seem to be withholding there is a joke, the identification of the CIA station in Mexico City. I think if this is what they acknowledged and you accepted it you have helped them pull your teeth because if Dube knows anything at all he knows that this was repeatedly officially disclosed and that it was the subject of extensive authorized CIA public testimony. I suggest that the last withholding within the text is of something like "results of the polygraph examination" and for this, the claim E "concerning an intelligence method as it pertains to the interrogation of Alverado". If Dube is willing to so attest, regardless of any later admission, he should have totally disqualified himself and you should say that to the judge and say that it undermines any credibility in his entire declaration.

Before I do anything more I'd like to have a better idea what you want.

I'll keep this with the xeroxes you left so I can find it without starting any new stacks in my office.

What I say above is, I think, adequate authentication of what is in my notes that I made in the margins before I looked at this crap. You really ought go after him for once because he is that completely vulnerable and that intendedly dishonest, with the court one of his targets. Blannery just might axelrad him.

in haste,

I have the impression that the Mexico City and other officially disclosed CIA stations are in what is withheld elsewhere.
